SCHMETZ INSIDE

VERITAS Marion

LEADS TO CREATIVE IDEAS

Super strong - and surprisingly light, the VERITAS Marion is built for professional use. 310 stitch programmes with utility and decorative stitches, alphabet and numbers will make you want to look for new challenges. With numerous comfort functions, you will have everything safely under control. Thanks to the innovative VERITAS computer technology, sewing is much more convenient. This is how passion is made out of work.

Clean sewn

With the automatic securing button, the machine first sews 3 securing stitches and then stops automatically. This ensures high-quality, masterful seams, which not only look professional, but are also durable and resilient. They are uniform and not too thick, as often is the case with conventional reverse sewing buttons.

Good thinking

The Veritas Marion thinks and acts with you. She knows for example that the twin needle takes a little more space and reduces the stitch width automatically. This protects the needle and the fabric. You won't always notice the clever help of the Veritas Marion, but what you will notice is the pleasant relaxed feeling after the work is completed.

More space to work

Just by removing the storage compartment, the sewing machine can be easily converted to a free-arm machine. Tubular goods, such as trouser hems and sleeves can be manipulated much more easily. With the extra extension table, the work surface can be increased if long lengths of cloth need to be processed, to reduce the tension on the fabric.

Nothing is lost

Marion lifted up many patents from the cradle. The Veritas Marion now stores uniquely personal sewing settings by pressing the memory button. Perfect configuration reveals a lot about individual sewing skills - the memory button preserves a piece of this art and saves a lot of time. With another key, you can fine tune these masterly settings.

Individually adjustable

The VERITAS Marion offers numerous features that facilitate the work and thus create more time for care and creative planning. Stitch width and stitch length can be adjusted continuously, and thanks to the extension button can be extended by up to 5 times their normal length. A button even allows the mirroring of the stitch pattern.

Specifications

310 stitch programmes with alphabet and numbers	Integrated threader
1-step automatic buttonhole function	Stitch length adjustable from 0.0 to 4.5 mm
10 different buttonholes	Stitch width adjustable from 0.0 to 7.0 mm
Memory function for personalised sewing patterns	Automatic thread tension
LCD display	Glare-free double LED sewing light
Start/Stop button	Solid alloy construction
Speed limiting adjustment lever	Large sewing table
Automatic thread cutter	Fold-out card of stitch patterns
Auto-lock-function

Buttonhole foot	3 bobbins
Overcasting foot	Screwdriver
Blind hem foot	Spool pin felt
Satin stitch foot	Second spool pin
Button sewing foot	64-pcs thread set
Brush	Extension table

A brilliant thinker

Often we hold something in our hands and ask ourselves who actually came up with this brilliant idea. For some, the answer is: Marion Donovan. Thanks to her numerous inventions, she was taken into the inventors' Hall of Fame in 2015. Her most famous work is the nappy which she developed by experimenting with her sewing machine. Which products of the future will be invented with our VERITAS Marion...?
